Art Unit: 1746

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to a liquid treatment equipment/method, classified in class 134, subclass 10.
 - II. Claims 13-20, drawn to process/equipment for manufacturing a semiconductor device, classified in class 438, subclass 400+.
2. The inventions are distinct, each from the other because of the following reasons:
 - i) Inventions of GROUP I and of GROUP II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not capable of being use together in that the invention of GROUP I is for use in *removing* a product and GROUP II is for use in *applying* a coating and they have different functions in that GROUP I requires a circulation of treatment solution bath, while GROUP II requires "coating a treatment agent containing a component" and stimulating a formation of plating and repressing the formation of plating on a substrate".
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
